### The space

Photoshoot opportunities are abundant within this space. Lush plants surround this two-acre homestead that features a 120-year-old restored Queenslander and an alpine timber cabin set amongst gorgeous gardens, with a running creek and wildlife. Whether it's an event after a tropical landscape or a shoot needing a coastal feel, this space is the perfect backdrop. The three bedrooms all offer private access to the covered wraparound verandah and share a stunningly renovated bathroom with a round stone bathtub.

The expansive kitchen revolves around an elongated island bench with seating that connects seamlessly to the dining area and revels in views across the property. Completing this functional design is the large ceramic sink and French-style oven, complimenting the French limestone hexagonal floor tiles. The suspended Aurora wood fireplace adds grandeur to the romantic ambience.

The creative backdrops are endless with food forests, bee hives, chickens, vegetable gardens, orchards and meadow flowers providing a stunning landscape. Inside, the property has been lovingly curated with provincial vintage elements and architectural features imported from France, Italy, UK and Egypt. Perfect for capturing an old-world charm, with high ceilings, rustic pine floorboards, French doors and original

windows.
