The space

This 1870's Homestead is a unique location and presents a range of options for filming your upcoming creative production or photoshoot. The character filled historic home gives it a certain charm that other film and TV locations cannot easily replicate. Bold rooms with stunning fire places, dramatic high ceilings, the original coach house and courtyard, 6 acres of established garden with trees over 100 years old, as well as a fully operational vineyard. The spaces could be suited to a wide range of projects and product launches or a location to showcase your product range. The Stables is also a popular backdrop for various media projects with its rustic charm and we can also provide a vintage carriage to add to the drama; or why not film in the original meat room which we have turned into our wine cellar.
